1947

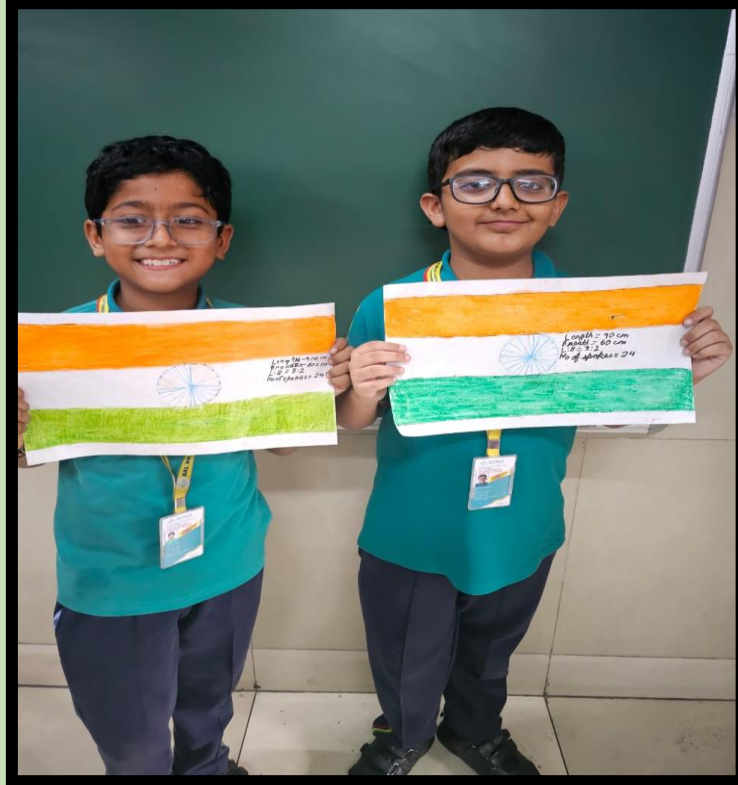

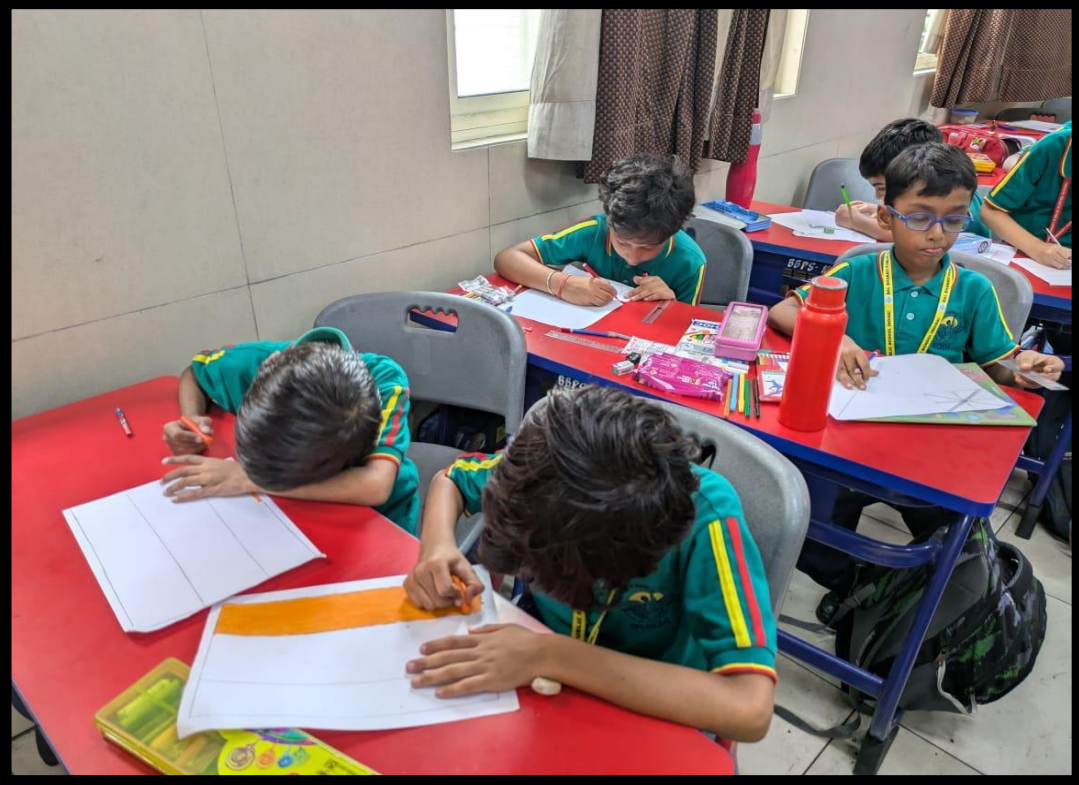

The evolution of the **Indian flag** reflects the country's journey through its struggle for independence and its diverse cultural heritage. Students were acquainted with the several flags used during the **Indian Independence Movement** after which the **Tiranga** was adopted in 1947. These flags represented different ideologies and movements striving for independence from the British rule. Students made an easy and a handy booklet where each page had **historical milestones** in the evolution of our **National Flag** with pictorial references. Understanding the changes in the flags over time and their respective significance encouraged students to think critically about how symbols evolve and what they represent. This activity allowed students to explore how different **cultural and political** influences shaped the national flag, fostering a broader understanding and respect for **India's multicultural fabric**.

Bal Bharti Public School has introduced the students with the basic measurement, number of spokes in our national flag emphasizing the concept of Measurement and lines. Students applied their knowledge of measurements to relate the length and width of the flag to the mathematical concept of ratio, and practice measuring distances in a real-world context.

Students gained a deeper understanding of the national flag, including the significance of its elements, fostering a sense of national pride and respect.
